Two U.S. Marine investigators looking into a series of grisly murders in Manila discover that the crimes are tied to an amulet with a 400-year-old curse on it that has unleashed supernatural forces which can possess people. Two U.S. Marine investigators, older tough Marine Colonel Joe Haines and his younger friend Andy Buck, investigate a series of grisly murders in Manila, Philippines. They soon discover that the crimes are tied to an amulet with a 400-year-old curse on it that has unleashed a supernatural force that wants revenge. Buck falls for TV reporter Sharon Gale who's there to cover the story. Unfortunately, she gets possessed and becomes an unstoppable killing machine. Col. Joe Haines (Erme) and Andy Buck (Jan-Michael Vincent, who we call JMV) are Marines going around Manila trying to get to the bottom of a mysterious series of murders. The authorities are blaming one of their fellow Marines, Tony McKee (Skipper), but Haines and Buck aren't so sure. Soon, reporter Sharon Gale (Everhard) is involved in unraveling the puzzling case. Meanwhile there is civil unrest with plenty of protesters objecting to the American presence in their country. A local senator and baddie with the less-than-frightening name of Belfardo (Gamboa) is trying to manipulate things for his own ends - and what of the ancient curse of the Demonstone? Could that be the cause of all the misery? Find out if you dare...

You might be thinking right now, "Demonstone? Isn't that a horror movie?" - and that is reasonable enough to think, but Demonstone is actually an action movie. Granted, there are some horror elements and the whole thing plays out like a cross between Saigon Commandos (1988) and Sultaker (1990) with a bit of Braddock: Missing In Action III (1988) thrown in for good measure. There's the prerequisite barfight and constant machine gun shooting. But JMV and R. Lee Erme make a great team. While JMV's dialogue seems a bit slurry this time around, his own hair picks up the slack. It looks cool, and gets progressively cooler in every scene. Truth be told, both his and Everhard's hair look exactly the same. You wouldn't be able to tell them apart if you saw them from the upper forehead up.

As for Erme, he plays a...wait for it...tough-talking Marine Colonel! Hey, better to be typecast than not cast at all. We're actually big Erme fans, and he does a great job. He's as intimidating as usual here, until a shot of him walking with JMV reveals him wearing some highly ridiculous shorts. Then we felt less intimidated. Interestingly, the great Brian Trenchard-Smith is credited as a producer on Demonstone, and he featured Erme prominently in the previous year's The Siege of Firebase Gloria (1989). Perhaps he was so impressed with him, he opted to use him again in this project. The editor on 'Firebase was director Prowse, who also directed Driving Force (1989). While Prowse did a good job, we can't help but wonder what the result would have been if Trenchard-Smith (who is one of our favorites) was in the director's chair.

We appreciated that the movie was shot in - and also took place in - the Philippines. They didn't try to pretend it was somewhere else. And actors like Gamboa and Avellana that we often see help liven things up. Surprisingly, Vic Diaz was not around for this one. In some of the protesting scenes, there are signs that say "Yankee Go Home", among others with questionable English. You gotta love it. Maybe whoever wrote the signs also wrote the script, because there is plenty of funny dialogue on display, which actually is one of the strongest points of Demonstone. Where else will you hear someone angrily call someone else a "corndog" as an insult? While Demonstone would have been stronger if there was a specific, central villain and JMV and Erme were cops busting heads to get to him, it's still worthwhile, especially if you've enjoyed the other horror/sci-fi/action hybrids of Fries Entertainment such as Peacemaker (1990) and Steel and Lace (1991). A beautiful television correspondent finds herself possessed by a vengeful demon, a former Chinese mystic who was slain by a Filipino warlord 500 years before. Before the mystic died he swore he would slowly destroy all of his descendants. Before the mystic died he swore he would slowly destroy all of his descendants. The mystic makes good on his promise and the victims are killed ritually and branded with the mark of the dreaded demonstone to prove the revenge. The reincarnation of the warlord, now a corrupt Filipino politician, tries to find the killer, but has no luck until an American Marine, Tony McKee is found near one of the most recent victims. The politician immediately frames him for the death. "Demonstone" plays better as a straight action flick with lots of gun fights, the horror sequences actually seem out-of-place. The acting is decent, the action almost never lets

up,unfortunately the horror moments are poorly done.6 out of 10. a5c7b9f00b
